

Hi Vivien,

I am a keen supporter of a massive urban pathway tree planting program...

There are issues to be worked through, but they can be!

We need to maintain WH&S, and Council currently requires significant qualifications for staff/volunteers to do work on Council land.

I think this could be relaxed IF qualified supervisors could oversee works.

I have had discussions with Brian about how to facilitate this.

We have to nut out the details, but... we could really make a difference to people affected
..social, health, community, environment

The 'environment' is:-

a safe place to work .

cool in Autumn/winter.

There are weeds to treat

We need trees in the ground

Post bushfire we have plenty of opportunities

Great community activity.

I believe Noosa Landcare would be in a position to provide mentoring and supervision.

In short, I think this is a great way to find opportunity out of adversity.

Let's make it work,

thanks Vivien.

Phillip M
